New Product Available from U.S. Patent and Trademark Office

The Information Products Division of the U.S. Patent and Trademark Office (USPTO) is announcing that *USAApp*, a new optical disc product, is now available for sale. *USAApp* is a document delivery product that offers facsimile images of patent application publications, including all text and drawings. The first set of patent application publications were published on March 15, 2001. In contrast with patent grants that are published every Tuesday, applications will be published every Thursday.

The American Inventor Protection Act, which went into effect on November 29, 2000 requires that certain applications filed on or after November 29, 2000 be published eighteen months after the effective filing date. This is a major change in the United States patent law. Previously, U.S. patent applications were kept confidential until the patent issued.

Now, the application will automatically be published unless the inventor verifies that he/she is not applying in a country other than the U.S. and specifically requests that the application not be published.

Utility and plant patent applications are subject to eighteen-month publication; design and provisional applications are not included in the law. Patent application publications will be distinguishable from patents by their numbering format that includes the country code (US), the year of publication, a 7-digit numerically sequenced number, and the kind code indicating the type of publication:

US 2001-0000001 A1 for the first publication of a utility application
US 2001-0000001 P1 for the first publication of a plant application

For more information about the eighteen-month publication process, please refer to the USPTO Web site at www.uspto.gov.

USAApp is a document delivery system, not a search system. Retrieval is by document number only from a cumulative index. There will be one disc per week for the near future; the number will probably increase with time, as more applications are published. This is anticipated to occur around August 2002. The early issues of *USAApp* will be published on CD-ROM but the product will migrate to DVD-ROM when it becomes necessary.

USAApp uses the Document Delivery for Windows (DocDW) software that is used with the USPTO's other document delivery products, *USAPat* and *USAMark*.

The DocDW software allows the user to view documents directly on the screen and move quickly from page to page within that document or move to the next document on the disc. Drawing details or text can be "zoomed" for easy viewing. Printing is possible from either the view or search screen. Users can print the entire document or selected pages. The user also has the capability to tag single or multiple documents for printing or exporting, print or export large ranges of document, or print or export all documents on the disc.

USAApp is available for sale on a calendar-year subscription basis only. The price per year is $2400. For more information about the *USAApp* product, please contact the Information Products Division at:

Of the 5874 pending appeals, 1806 are currently assigned to administrative patent judge dockets.
With the exception of a limited number of appeals involving special circumstances, the Board of Patent Appeals and Interferences is currently deciding appeals received at the Board as follows:

SPECIAL BOXES FOR PATENT MAIL

Special box designations should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these special boxes. If any documents other than the specified type identified for each special box are addressed to that box, they will be significantly delayed in reaching the appropriate area for which they are intended.

Some correspondence may only be submitted via the Office's electronic filing system (EFS). For example, the following publication requests must be submitted via EFS:

a request for publication of an application as amended during examination (37 CFR 1.215(c));
a request for redacted publication (37 CFR 1.217(b));
a request for voluntary publication of an application filed before November 29, 2000 (37 CFR 1.221(a)); or
a request for republication of an application that has already been published (37 CFR 1.221(a)).

Instructions on how to file such a publication request via EFS are located on the Office's Electronic Business Center on the Office's Internet Web site http://www.uspto.gov <http://www.uspto.gov>) under the Electronic Business Center section.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information for the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis optical disk series are available at all PTDLs to increase access to that information. It is through the optical disk systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) at the Sunnyvale Public Library in Sunnyvale, California and at the South Central Intellectual Property Partnership at Rice (SCIPPR) at the Fondren Library of Rice University in Houston, Texas.

SECTION 1.— INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
